Legend:

*	DFO compiles information on subsistence walrus harvests by telephone calls to community Hunters and Trappers Organizations, or the local Government of Nunavut Wildlife Officers.
¥	see Marine Mammal Regulations (SOR/93-56) S. 6 (1)(c), S. 6 (2)(c), and S. 26.
Sp	Licensed Sport Hunt - a regulated sport hunt is conducted in some Nunavut communities. The Nunavut Wildlife Management Board (NWMB) reviews walrus sport hunt applications annually, and transmits its approval decisions to DFO.
--	This community did not, or does not, conduct sport hunts
	Sport hunts were conducted and/or approved in this community
M	For two years (2008/09 and 2009/10) the Igloolik HTA implemented a moratorium on walrus sport hunting and tourism.
Sb	Subsistence Harvest - 'NR' indicates the community has not reported its subsistence walrus harvest.' pending' indicates that the community has not reported their subsistence walrus harvest to DFO yet.
	Value was originally reported with an associated error, and has been replaced with an average value to provide a more precise annual estimate of landings. For example:
	a Cape Dorset Subsistence harvest in 1999 was reported as 10 +/- 2; this value was replaced with the average (10).
	b Iqaluit Subsistence harvest 1999 was originally reported as 15 +/- 2; this value was replaced with the average (15)
	c Pangnirtung Subsistence harvest 2001 was originally reported as 19 +/- 1; this value was replaced with the average (19)
	d Coral Harbour Subsistence harvest 2002 was originally reported as 25-30; this value was replaced with the average (28).
	e Coral Harbour Subsistence harvest 2009 was originally reported as 5-6; this value was replaced with the average (6).
	f Hall Beach Subsistence harvest 2010 was orginally reported as 70-80; the value was replaced with average (75).
	g Qikiqtarjuaq Subsistence harvest 2010 was orginally reported as 5-6; the value was replaced with the average (6).
	h Hall Beach Subsistence harvest 2011 was originally reported as 30-35;the value was replaced with average (33).
	i Qikiqtarjuaq Subsistence harvest 2011 was orginally reported as 4-5; the value was replaced with the average (5).
§	The Nunavik community of Salluit conducts licensed sport hunts within the Area of Equal Use and Occupancy described in S. 40 of the Nunavut Land Claims Agreement.

Figure 4. Approximate distributions of the Atlantic walrus populations in Canada. Walrus management stocks within these populations include: BB = Baffin Bay, FB = Foxe Basin, NWHB = North and West Hudson Bay, PS-LW = Pnny Strait-Lancaster Sound, SEB = South and East Baffin, and SHSUBL = South Hudson Strait-Ungava Bay-Labrador, and WJS = West Jones Sound. Question marks (?) indicate uncertainty with respect to distributions and/or movements.
