Foxe Basin population:

1) 2012 – 2013 Quota was 8 + 1 KWB tags (6 - males, 3 - Females)
 7 defense kills, 1 problem kill.
 The quota for FB usually 12 due to too many defense kill in 2011 – 2012 it went down to 8.

Arviq HTO did not open the season 2012 – 2013 wanting the quota to get back to 12 knowing we would need the tags for deterrent kills.

2013 – 2014 quota went back to 12 wildlife technician will give us the number of males and females along with credits with the report in a couple weeks.

2) We would like to increase our quota for our community Arviq HTO directors mentioned 17 tags would best fit to our community to bring back the Inuit to hunt properly not just to harvest when a bear comes to our community.

3) Yes, for the past couple years we mostly had deterrent kills.

4) Board of directors thinks increasing the TAH to 17 would best fit harvesters here not too much but, enough therefore we close the season when hunters are still interested in harvesting.
