Direction

- To develop a plan that better represents what Inuit see and believe in regard to polar bears
- To try and develop a plan that could be adopted under the Species at Risk Act (SARA)

ԾԱՆՈԼԶՆ

- [illegible]

What have we done?

- Formed a working group of stakeholders
- Prepared and reviewed an outline with IWAC in June 2014
- Developed a rough draft

What have we done?

- Consulted with all communities in the winter of 2015
- Revised and finalized a draft based on input
- Held regional meetings to review and improve draft and review management objectives in spring 2015
- An internal DoE review shortened and simplified

The NWMB Process

- Submitted to NWMB and they held a written hearing
- NWMB reviewed input received during written hearing and adjourned meeting
- Asked Minister to consider input received

Management Action	Priority	Timeline
Undertake a review of the sustainable removal rates for females	high	3 years
Test revisions to the flexible quota system to ensure they are administratively feasible (revisions will switch to a 1:1 reduction in TAH the following year for overharvest, i.e. if one female is overharvested the reduction will be only one female the following year (If a female overharvest cannot be accommodated through credits or from the following year's TAH then regular flex quota reductions will apply were male credits will go into the bank as opposed to being automatically available).	high	2 year
Expand and increase harvest bio-characteristics reporting upon peer review of research objectives	high	5 year
Improve handling of hides taken as DLPK to ensure no loss in hide value	high	Ongoing
Ensure harvest reporting and sample submission is adequate to address needs	high	Ongoing
Develop a training program for Inuit in communities to establish an Inuit data collection program for hunter effort and interviews and collection of polar bear bio-characteristics	moderate	5 years
