Chairpersons of all
Nunavut Hunters and
Trappers Organizations

Dear colleagues:

Re: Written public hearing of the Nunavut Wildlife Management Board to consider approval of the Narwhal Flexible Quota System and Tag Transfer Policy Phase II of the Integrated Fisheries Management Plan for Narwhal in the Nunavut Settlement Area

The Nunavut Wildlife Management Board (NWMB or Board) has scheduled a written public hearing to consider a *Proposal for NWMB Decision* (Proposal) submitted by Fisheries and Oceans Canada seeking approval of the Narwhal Flexible Quota System and Tag Transfer Policy Phase II of the *Integrated Fisheries Management Plan for Narwhal in the Nunavut Settlement Area*.

A written public hearing is one in which all submissions and supporting documentation are filed in writing, and the hearing does not have an oral component. Attached to this letter is a copy of Fisheries and Oceans Canada's Proposal and the *Rules for the NWMB Written Hearing*. These – along with a number of additional documents comprising the best available information to date – are also available for download from the NWMB's website (www.nwmb.com), or by contacting the Board at the following address:

NUNAVUT WILDLIFE MANAGEMENT BOARD

P.O. Box 1379, Iqaluit, NU, X0A 0H0

Phone: (867) 975-7300

Fax: (888) 421-9832

Email: receptionist@nwmb.com

Through this letter, the NWMB is extending an invitation to your department or organization to provide written submissions and supporting documentation in response to Fisheries and Oceans Canada's Proposal, or otherwise regarding the Narwhal

Flexible Quota System and Tag Transfer Policy Phase II. All written materials must be filed with the NWMB – in Inuktitut and English – by no later than 5:00 p.m. (Iqaluit time) on August 12th 2016. The requirement for translation at the time of filing is mandatory.

Subject to relevant confidentiality or privacy concerns, all submissions and supporting documentation will be placed on the NWMB's website, and will be available for download.

Please take careful note that, unless persuasive written and translated reasons are provided to the Board for late filing, the NWMB will not consider materials for this hearing that are not filed on time.

Submissions and their supporting documentation may be filed with the Board in person, by courier or by mail. They should be clearly marked as pertaining to the *NWMB Written Hearing to consider the Narwhal Flexible Quota System and Tag Transfer Policy Phase II*. Delivery of materials may also be made through fax or electronic transmission, but only if your department or organization confirms with the NWMB – prior to the filing deadline – that a complete and legible copy of the transmission has been received by the Board. Materials are deemed to have been filed on the actual day of receipt by the NWMB.

Please keep in mind that the more thorough, reliable and persuasive submissions and supporting documentation are, the more weight they will be given by the NWMB in the *Nunavut Land Claims Agreement* decision-making process. After the deadline for delivery of the written submissions, the NWMB will consider all of the relevant evidence and arguments filed, and will make a decision concerning the proposed Narwhal Flexible Quota System and Tag Transfer Policy Phase II, which will be forwarded to the Minister of Fisheries, Oceans and the Canadian Coast Guard.

If you require further information, please do not hesitate to visit the NWMB's website or to contact the Board directly.

Sincerely,

Daniel Shewchuk
A/Chairperson of the
Nunavut Wildlife Management Board

Information:

Decision: X

Issue: Modification to existing Total Allowable Harvest levels for Baffin Bay Narwhal Stocks and Narwhal in Jones and Smith Sounds, Nunavut and Approval of the Narwhal Flexible Quota System

Background

In August 2013, Fisheries & Oceans Canada (DFO) conducted the first within season aerial survey of the six Canadian narwhal summer aggregations in the high Arctic: Somerset Island stock, Admiralty Inlet stock, Eclipse Sound stock, East Baffin Island stock in the Baffin Bay population; and the Jones and Smith Sounds stocks near Grise Fiord (Figure 1). DFO Science used the results of this survey to estimate the abundance of narwhal and calculate Total Allowable Landed Catch (TALC) recommendations for each of these stocks (Table 1). In general, the 2013 abundance estimate for the Canadian high Arctic narwhal is higher than previous estimates with the exception of the Eclipse Sound stock, which saw a decrease of almost half from the previous 2004 survey (Tab 1- Abundance estimates of narwhal stocks in the Canadian High Arctic in 2013).

Science advice was also received on the sustainability of the “*flexible quota system*” that has been used on an interim basis since 2013. This flexible quota system allows for the carry-over of unused TAH to be used in the subsequent hunting season.

The science advice indicates that the flexible TAH system and tag transfer policy currently being used for narwhal is sustainable, as long as the total hunting mortality over the five-year period does not exceed five times the annual Potential Biological Removal (PBR) level (Tab 2- Sustainability of a Flexible System of Total Allowable Annual Catches of Narwhals).

Narwhal are designated as Special Concern by the Committee on the Status of Endangered Wildlife in Canada (COSEWIC). They are also listed on Appendix II of the Convention on International Trade in Endangered Species of Flora and Fauna (CITES) and a non-detriment finding (NDF) from the DFO Scientific Authority is required to obtain a CITES Export/Re-export permit for international trade of narwhal products from Canada. There is currently a standing positive NDF for all narwhal stocks in Canada.

Based on the lower 2013 abundance estimate for the Eclipse Sound narwhal stock, the existing Total Allowable Harvest (TAH) of 236 would need to be reduced to 134, in line with the new TALC advice, for the DFO Scientific Authority to issue a positive NDF finding for this stock and therefore maintain the ability to internationally export narwhal products harvested from the Eclipse Sound stock.

Community consultations on the Science advice for narwhal management

DFO conducted consultations with potentially affected Inuit on management options to implement the new science advice and the flexible quota system. The consultation process had two components: (1) in-person consultations with the communities of Arctic Bay, Pond Inlet, Clyde River and Qikiqtarjuaq April 18-22, 2016; and (2) written consultations with the remaining communities that harvest from the Baffin Bay, Jones and Smith Sounds narwhal stocks, as well as the Kitikmeot and Qikiqtaaluk Wildlife Boards.

DFO was seeking input on:

1. Proposed TAH modifications, specifically, *to modify the existing TAHs for the Baffin Bay and Jones and Smith Sounds narwhal Management Units based on the 2013 survey results*; and
2. The formal implementation of the “narwhal flexible quota system” and tag transfer policy phase II (Tabs 2 and 3).

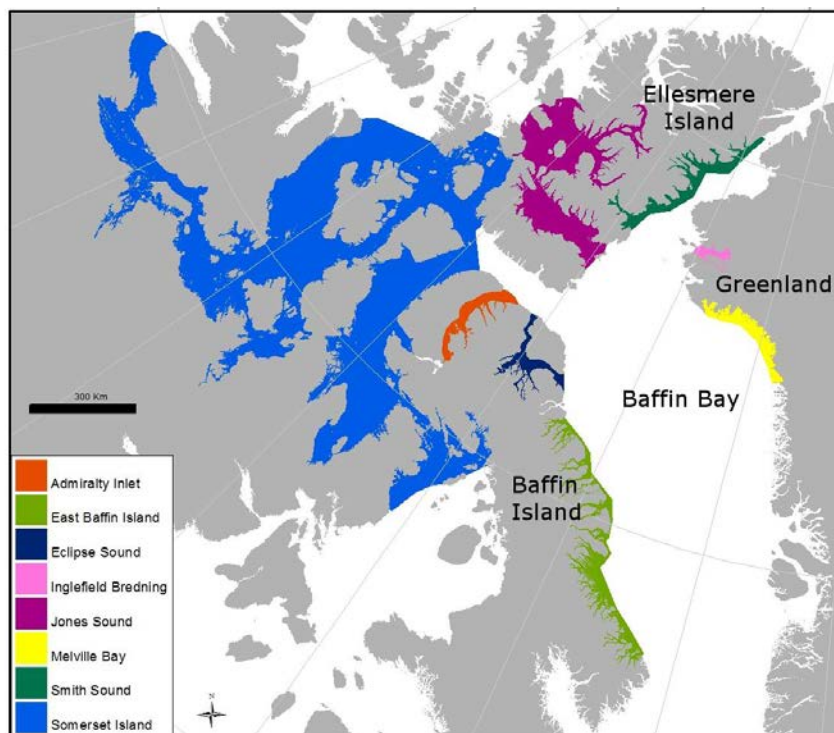

Figure 1. Map of High Arctic narwhal summer aggregations (source: NAMMCO/SC/21-JCNB/SWG/14-05).

Table 1. New Total Allowable Landed Catch (TALC) science recommendations for narwhal stocks based on the 2013 aerial survey results (CSAS SAR June 2015) in comparison to the current Total Allowable Harvests (TAH).

Narwhal Stock	Management Unit	Current TAH*	New TALC (TAH) Recommendations
Somerset Island	SI	532	658
Admiralty Inlet	AI	233	389
Eclipse Sound	ES	236	134
East Baffin Island	EBI	122	206
Unassigned	Jones Sound	50**	76
Unassigned	Smith Sound		77

* established by the NWMB in 2013 and approved by the Minister of DFO

** while there is no TALC, the Minister did approve a Total Allowable Harvest (quota) of 50 for both areas combined.

In-Person Consultation Results (included a meeting with the HTO and a public meeting in each community)

Modification of the TAH:

- The communities of Arctic Bay, Clyde River and Qikiqtarjuaq appeared to be in general support of the proposed TAH modifications for Admiralty Inlet and East Baffin Island narwhal stocks.
- The community of Pond Inlet did not support the recommended TAH modification for the Eclipse Sound stock.
 - The HTO suggested that the decrease in the abundance estimate for Eclipse Sound was a result of ship traffic, whales moving all over the place (including to Western Nunavut communities), and difficulty in counting submerged whales.
 - The community stated that the numbers of narwhal vary from year to year.
 - The HTO explained that there was a lot of movement by narwhal between Admiralty Inlet and Eclipse Sound and suggested that if the count had been done at a different time of year it is possible that there would have been a decrease in Admiralty Inlet and an increase in Eclipse Sound abundance estimates.
 - The HTO wanted to maintain the status quo (i.e. the TAH that was established in 2013) for a period of five years.

Implementation of the Narwhal Flexible Quota System:

- There were no concerns raised about implementation of the flex quota system from the communities of Arctic Bay and Pond Inlet;
- There appeared to be support for implementation of the flex quota system from the communities of Clyde River and Qikiqtarjuaq.

Implementation of Tag Transfer Policy Phase II:

- There were no concerns raised about implementation of tag transfer phase II from the communities of Arctic Bay and Pond Inlet;
- There appeared to be support for implementation of tag transfer policy phase II from the communities of Clyde River and Qikiqtarjuaq subject to support from QWB and DFO.

CITES (the Convention on International Trade in Endangered Species of Wild Fauna and Flora)

- *Arctic Bay, Clyde River, and Qikiqtarjuaq:* There were no concerns raised about these points during both the community and HTO meetings.
- *Pond Inlet:* The HTO said that Inuit are less concerned about selling narwhal products internationally and more interested in harvesting for food.

A full report on the consultation results can be found in TAB 4.

Written Consultation Results

DFO invited other affected HTO and community members to participate in the written consultation process by providing comments or concerns on the proposed TAH modifications and implementation of the flex quota system, by May 31, 2016 (Tab 5). The communities participating in the written consultations harvest from narwhal stocks where DFO is recommending an increase in the TALC/TAH.

DFO will provide additional information on the written consultation results at the NWMB's June 2016 meeting

Proposed changes to the current narwhal management regime

Changes to the current narwhal management regime are being proposed for the conservation of narwhal stocks and populations and to ensure that Inuit harvesting is restricted only to the extent necessary to achieve conservation purposes. This will provide for sustainable harvesting activities and the retention of associated economic opportunities. In addition, the formal implementation of the flex quota and tag transfer system will provide harvesters, HTOs and RWOs increased flexibility in harvest allocations and utilization.

Recommendations:

DFO is requesting approval from the NWMB on the following:

- Modify the existing TAHs for the Baffin Bay and Jones and Smith Sounds narwhal Management Units based on the 2013 survey results identified in Table 1 (NLCA s 5.2.33(d)).
- Formally approve the Narwhal Flexible Quota System and Tag Transfer Policy Phase II (NLCA s.5.2.33(k)).

The goal is to have a final decision approved by the DFO Minister and ready for implementation for the 2017 harvest season

Rules for the NWMB's Written Public Hearing to Consider Approval of the Narwhal Flexible Quota System and Tag Transfer Policy Phase II

July 8, 2016

THE PURPOSE of this Nunavut Wildlife Management Board (NWMB or Board) written public hearing is to consider approval of the Narwhal Flexible Quota System and Tag Transfer Policy Phase II of the Integrated Fisheries Management Plan for Narwhal in the Nunavut Settlement Area.

Fisheries and Oceans Canada has filed a *Proposal for NWMB Decision* (Proposal), seeking approval of the Narwhal Flexible Quota System and Tag Transfer Policy Phase II of the Integrated Fisheries Management Plan for Narwhal in the Nunavut Settlement Area. The Proposal, along with other documents comprising the best available information to date, is available for review or download from the NWMB's website (www.nwmb.com).

HEARING RULES:

1. The NWMB shall provide notice to the public at least thirty (30) days prior to the deadline for filing hearing submissions.
2. Any interested person or body may file with the NWMB a written submission and supporting documentation¹ in response to Fisheries and Oceans Canada's Proposal, or otherwise regarding the Narwhal Flexible Quota System and Tag Transfer Policy Phase II – duly translated into Inuktitut or English as the case may be – by no later than 5:00 p.m. (Iqaluit time) on August 12th, 2016.
3. Unless persuasive written and translated reasons are provided to the NWMB for late filing, the NWMB will not consider materials for this hearing that are not filed on time.
4. The requirement for translation of submissions and supporting documentation filed with the NWMB does not apply to individual members of the public.
5. For all others who file supporting documentation with the NWMB, the requirement for translation does not apply to such documents over ten (10) pages in length, as long as each supporting document that is not translated is accompanied by a concise, translated summary (English and Inuktitut) at least two (2) pages in length.

¹ "*Supporting documentation*" refers to one or more studies, articles, opinions or other documents separate from a person's or organization's written submission, filed as additional evidence and/or argument in support of that person's or organization's submission.

6. The NWMB shall ensure that all materials filed with it or produced by it are made publicly available, subject to relevant confidentiality or privacy concerns.
7. Any representative or agent of the Government of Canada or Government of Nunavut, any Hunters and Trappers Organization or Regional Wildlife Organization and any Inuk shall be accorded the status of party for the hearing.
8. Unless invited by the NWMB to be a party, any other person or body wishing to be named as a party by the NWMB shall make an appropriate request in writing to the NWMB.
