March 31<sup>st</sup>, 2016

Honourable Johnny Mike  
Minister of Environment  
Government of Nunavut

Dear Minister Mike,

**Re: Aiviq Hunters and Trappers Organization's (Cape Dorset) request to obtain 5 male polar bear credits from the Foxe Basin subpopulation for use during the 2015-2016 harvest season**

On February 16<sup>th</sup> 2016, the Nunavut Wildlife Management Board (NWMB or Board) received a letter from the Qikiqtaaluk Wildlife Board regarding a request from the Aiviq Hunters and Trappers Organization (Cape Dorset) to obtain 5 male polar bear credits from the Foxe Basin polar bear subpopulation, for use during the 2015-2016 harvest season (Appendix 1 and 2). The letter indicated that the Qikiqtaaluk Wildlife Board supports the polar bear credit request. This request was presented to the Board during its In-camera meeting (IC 003-2016) on March 16<sup>th</sup> 2016, where the Board passed the following resolution:

*RESOLVED that the NWMB grant the Aiviq Hunters and Trappers Organization five (5) male polar bear credits from the Foxe Basin polar bear subpopulation for use during the 2015-2016 harvest season, which is compliant with the 'Polar Bear Management Memorandum of Understanding for the Management of the Foxe Basin Polar Bear Population' and its associated flexible quota system.*

In making this decision, the NWMB considered the credit record for the Cape Dorset Hunters and Trappers Organization from the Foxe Basin subpopulation; the Government of Nunavut – Department of Environment has confirmed that there are 5 male polar bear credits available (Appendix 3). By granting the use of 5 additional polar bear credits, the community quota will increase from 5 (3 male: 2 female) to a total of 10 (8 male, 2 female) for the 2015-2016 harvest season.

If you have any questions or concerns, please do not hesitate to contact the NWMB.

Sincerely,

Daniel Shewchuk  
Acting Chairperson of the  
Nunavut Wildlife Management Board

c.c. Drikus Gissing, Director of Wildlife Management, Government of Nunavut-Department of Environment;  
Mike Harte, Polar Bear Harvest Technician, Government of Nunavut-Department of Environment;  
James Qillaq, Chair, Qikiqtaaluk Wildlife Board; and  
Resolute Bay Hunters and Trappers Organization.

Re: Letter of Support for Polar Bear Credit Utilization

---

Qikiqtaaluk Wildlife Board (QWB) Executive received three request from HTOs to utilize their polar bear credits for the 2015-2016 harvest season. Upon review by QWB Executive during their February 16, 2016 call, which included information provided by DoE's Polar Bear Technician, the following decisions have been made;

1. Aiviq HTO (Cape Dorset) request for 5 male tags from their Foxe Basin credits:  
Supported
2. Hall Beach HTA request for 2 tags (1 male & 1 female) from their Gulf of Boothia credits:  
Supported
3. Pangnirtung HTO requested 11 tags (9 male & 2 female) from Davis Strait credits: GN informed the Executive that the Pangnirtung HTO didn't have any female credits, so Pangnirtung opted to request for only male credits of 9. Once Pangnirtung confirmed this on the call, QWB supported the request for 9 male tags under their Davis Strait population credits.

Accompanying this letter is all the information QWB received in making their decision for NWMB's review. QWB requests that once a final decision is made by the Minister of Environment, QWB receives correspondence outlining the final decision made. This will alleviate much waiting and questions from both the HTO and QWB itself.

If you have any questions please feel free to contact our QWB staff; Jason Mikki, Regional Coordinator – 928-8430, email: nqwb@niws.ca or Jackie Price, 979-4631, email: jprice@niws.ca

Sincerely,

**RE: Request to use Polar Bear Credits for 2015-2016 Harvest**

The Aiviq Hunters' and Trappers' Organization (HTO) would like to request to use 5 male polar bear credits from the accumulated credits (male 9.07 and female 0 as of 2014-2015 season) for the 2015-2016 harvest season from the Foxe Basin polar bear subpopulation. The accumulated credits have been verified with the Department of Environment.

We stopped our harvest early last season due to 2 lost bears which were in turn were counted as females against our quota this season (see Table 1). We would appreciate it if you can assist us in getting the requested credits.

Table 1 outlines the 2014-2015 harvest and recommended 2015-2016 harvest for Cape Dorset.

Community	Pop.	Base Allocation	Allocation 2014-2015			Harvest 2014-2015			Recommended Harvest 2015-2016		
			Total	M	F	Total	M	F	Total	M	F
Cape Dorset	FB	12(8:4)	12	8	4						
QWB Tag	FB	1 (1:0)	1	1	0						
<b>TOTAL</b>	<b>FB</b>	<b>13 (9:4)</b>	<b>13</b>	<b>9</b>	<b>4</b>	<b>11</b>	<b>5</b>	<b>6</b>	<b>5</b>	<b>3</b>	<b>2</b>

Please let me know if further process we have to follow or for further information contact us at the above address or number.

Sincerely,

Adamie Nuna

**RE: Request from Aiviq Hunters and Trappers Association to draw 5 male polar bear credits from the Foxe Basin subpopulation for use in the 2015/2016 polar bear harvest season**

Dear Jason,

This letter is intended to provide information to the QWB regarding the Aiviq Hunters and Trappers Association's current polar bear credit status and a brief summary of the recent historical harvest within the Foxe Basin polar bear subpopulation. This letter will satisfy section 4.2 of the Foxe Basin Polar Bear Memorandum of Understanding and provide additional harvest information to aide your board in the decision making process.

The Aiviq Hunters and Trappers Association currently has 9.07 male polar bear credits available for use in the 2015/2016 harvest season. No female credits are currently retained by Aiviq HTA.

During the 2014/2015 harvest season, Aiviq HTA harvested 11 bears in their regular hunt. No harvested bears were reported outside of this category. The sex ratio of harvested bears was 5:4 (male to female) and 2 harvested bears of unknown sex. The two unverified bears were counted as female for the purposes of total allowable harvest calculations (flexible quota). These two unverified bears resulted in an overharvest of two females and further resulted in a TAH reduction of 7 bears (5 males, 2 females) in the current harvest season.

The 2013/2014 harvest season saw an overharvest of 1 male. Credits were in place to cover this over harvest, the TAH was not exceeded and no TAH reductions resulted.

2012/2013 saw an overharvest of 1 female. Credits were in place to cover this overharvest, the TAH was not exceeded and no TAH reductions resulted.

2011/2012 saw an overharvest of 1 male. The TAH was exceeded by one bear however; credits were in place to cover the over harvest and no TAH reductions resulted.

In 2010/2011 the TAH was met, the sex ratio was 2:1 and appropriate credits were allocated.

If you or your board require any additional harvest information, please feel free to contact the polar bear lab directly. The Polar Bear Biologist can answer any questions outside of harvest statistics.

I look forward to hearing from you again on this matter and hope this information will help provide Aiviq with a timely resolution to their request.

Sincerely,
