- The Designated Officer will attach the Marine Mammal Tag to the tusk using a permanent attachment device (MMR s. 24).
- The hunter will then bring the tusk (with complete Marine Mammal Tag and permanent attachment device) to HTO office.
- The HTO will remove the return portion from the Marine Mammal Tag and record all the harvest information

Harvest Reporting

The reporting of harvest information is required (MMR s. 17 and 24)

- Narwhal without a tusk
 - Marine Mammal Tag return portion is returned to HTO office and all harvest information is recorded by the HTO
- Narwhal with a tusk
 - The hunter will bring tusk (with complete Marine Mammal Tag and permanent attachment device) to HTO office
 - The HTO will remove return portion from Marine Mammal Tag and record all the harvest information
- Reporting of all non-hunt related narwhal harvests is required (NLCA s. 5.7.43), such as narwhal caught in fishing nets or humanely harvested due to ice entrapment.

Exporting

Possession of untagged tusks is illegal (MMR s. 14).

A Marine Mammal Transportation Licence is required to transport your narwhal tusk out of Nunavut. The Marine Mammal Transportation Licence is free and available in the community from the local Conservation Officer or a Fishery Officer.

To export narwhal products or parts from Canada you require a CITES Export Permit. This permit can take several weeks to obtain. For more information you can contact the DFO CITES Management Authority at (888) 641-6464.

For a complete list of regulations or to answer any questions, please contact your local Conservation Officer or a Fishery Officer.
