FIGURE 1:

Figure 1 shows a map of the northern part of the island of Hispaniola, specifically the area around Port-au-Prince, Haiti. The map includes a grid of latitude and longitude lines. A red shaded area represents the study area, which is roughly bounded by 18°30'N to 18°45'N and 72°30'W to 72°45'W. A white shaded area represents the catchment area of the Deltal River, which is shown flowing into the sea. A small black shaded area represents the catchment area of the Artibonite River, which is shown flowing into the sea. The map also shows several rivers and streams, including the Deltal River, Artibonite River, and various smaller tributaries. The terrain is depicted with different shades of brown and green, indicating elevation and vegetation.

Figure 1 shows the study area (red shaded) and the catchment areas of the Deltal River (white shaded) and the Artibonite River (black shaded). The map also shows the location of the study area relative to the city of Port-au-Prince and the coastline of Hispaniola.
