

# PRIMARY OBJECTIVE

An adaptive guide to research, monitoring, and management of the Baffin Island caribou population

# HISTORY OF THE BAFFIN ISLAND CARIBOU MANAGEMENT PLAN

2004

- Initial consultations prior to drafting of a plan (South Baffin)

July 2013

- Workshop in Iqaluit with close to 60 wildlife co-management partners on caribou management on Baffin Island

January  
2014

- Consultations with Baffin Communities and co-management

Dec 2014

- Draft plan developed with co-management partners

March 2016

- Draft plan submitted to NWMB for decision. NWMB requests additional consultation regarding edits in Plan

2015 to  
2018

- Baffin Biologist position vacant. Progress on consultations and finalization of plan on hold

2018

- Baffin Biologist position filled. Additional consultations and plan finalization made a priority

# CONSULTATION TIMELINE

PRESENT	<ul style="list-style-type: none"><li>• No comments received from co-management partners from September 2018 up to September 2019.</li></ul>

# CHANGES SINCE NWMB SUBMISSION

## The revisions to the most recent include:

Added research results from composition surveys completed from 2015- 2018

Removal of 5 harvest management units

Removal of recommended harvest management actions based on population phase

Revised the implementation schedule for monitoring activities, to accommodate the updated submission date

Primary focus is monitoring of Baffin Island Caribou

# RECOMMENDATION

The GN requests that the NWMB approve the revised Baffin Island Caribou Co-Management Plan
