

Appendix B. Historical and Proposed Total Allowable Harvests (TAH) and Basic Needs Levels (BNL) for Narwhal management Units Harvested by Six (6) Inuit Communities on Northern and Eastern Baffin Island.

Management Unit	2013 IFMP TAH and BNL ¹	2017 TAH and BNL Modifications	2020-22 Proposed TAH and BNL ^{2,3}
Admiralty Inlet	233	233	---
Eclipse Sound	236	236	---
East Baffin Island	122	206	---
Northern and Eastern Baffin Island (NEBI)	---	---	675 ⁴
Total for NEBI	591	675	675

¹ Fisheries and Oceans Canada. 2013. Integrated Fisheries Management Plan for Narwhal in the Nunavut Settlement Area.

² QWB. 2020. Amendment of Narwhal Summer-Stock Harvest Management for Baffin Island, 2020. Submission to the Nunavut Wildlife Management Board. [Note: Method of establishing BNL for narwhal in Northern and Eastern Baffin Island waters was described, but specific numbers not given in submission.]

³ QWB is responsible for allocating and managing the BNL among Inuit. The Nunavut Agreement requires the NWMB to determine a BNL for Inuit when it establishes a TAH.

⁴ This would be both a TAH and BNL for the NEBI narwhal. The QWB is NOT proposing to change in the total of the three TAHs and BNLs, only that the three TAHs and BNLs are amalgamated into one.
